📂 PROJECTS

FRESHCART 🔗
- Developed a fully functional E-commerce website using React, Redux, and styled-components.
- Implemented features like product listing, shopping cart, and user authentication.
- Utilized RESTful API endpoints to fetch and display product data.

Notes 1.2
- Developed a fully Notes app using React & styled components.
- Implemented features like add, edit, delete, search, notes listing & user authentication.
- Utilized RESTful API endpoints to fetch and display user notes.

Notes 1.1 🔗
- Notes App in HTML, CSS & JavaScript only.
- In this note app, users can easily add, edit, or delete their notes (CRUD Operations).
- The notes user has added to this app will be stored in the browser's local storage so, they won't remove on page refresh or tab close.

Yummy 🔗
- Meals App in HTML, CSS, Bootstrap, JavaScript & JQuery.
- In this app, user can easily search any meal in two ways by meal name or meal first letter, can also find any meal on the list and know full details about it.
- Utilized RESTful API endpoints to fetch and display meals by categories, area, ingredients & their details.

Daniels 🔗
- Complete responsive personal portfolio website using HTML, CSS, Bootstrap & JavaScript.

🧠 SOFT SKILLS

- Communications Skills
- Presentations Skills
- Problem solving and Troubleshooting
- Fast self-learner
- Critical thinking
- Flexibility and Adaptability
- Collaboration and Teamwork
